

Invest in a professionally managed target date fund

Our target date funds are managed based on a projected retirement date and continue to be managed for approximately 30 years beyond that date. Investment professionals manage the portfolio, moving it from a more growth-oriented strategy to a more income-oriented focus as the target date gets closer.

Because investment professionals adjust each fund's holdings over time, there's no need for you to make changes as your retirement date approaches. Keep in mind that although target date portfolios are managed on a projected retirement date time frame, this allocation strategy does not guarantee that your retirement goals will be met.

Capital Group, home of American Funds®, is a key provider for your retirement plan

- Since 1931, we have invested with a long-term focus and attention to risk.
- More than half of the 68 million investor accounts in American Funds are retirement accounts.*

* Includes assets invested in 401(k)s, SEPs, SIMPLEs and IRAs as of 12/31/25.

Important information about objectives, risks, charges and expenses for collective investment trusts is contained in the Characteristics Statement and/or other fund disclosure document(s), which can be obtained from the fund's trustee and/or the participants' plan provider or employer.

Advisory services offered through Capital Research and Management Company (CRMC) and its RIA affiliates. Capital Client Group, Inc., member FINRA.

One fund. Many benefits.

Target date funds simplify investing for retirement

A target date fund is a ready-made portfolio aligned with a planned retirement date.

Capital Group Target Date Retirement Blend Series collective investment trust funds take the guesswork out of investing. They're an intelligent choice for investors who don't want to spend a lot of time and effort choosing and monitoring their own investments.

The target date is the year that corresponds roughly to the year in which you plan to retire and begin taking withdrawals. Because a target date fund generally holds many different kinds of investments, the fund you choose offers a diversified portfolio designed to help smooth the market's ups and downs.

Our target date funds provide an opportunity to achieve favorable retirement outcomes using a single investment vehicle. By leaving the investment selection to experienced professionals, you'll have more time to focus on other things.

Investments are not FDIC-insured, nor are they deposits of or guaranteed by a bank or any other entity, so they may lose value.

Collective Investment Trusts (CITs) are available for investment only to certain qualified retirement plans. Capital Group CITs are maintained by Capital Bank and Trust Company ("trustee"), which has retained an affiliate to serve as investment adviser to the trustee.

Target date funds are a simple choice that can help your assets last through retirement.

Investment goals change over time

- To address longevity risk (the threat of outliving your savings), our target date funds seek capital appreciation from stocks and other assets during your earning years.
- To address market risk (volatility of returns), they seek stability from fixed income and other assets as you approach and enter retirement.

An investment mix managed beyond your retirement date

Because people are living longer, it's important that the fund you select has the potential to provide income for several decades. For this reason, Capital Group's target date funds will continue to be managed professionally for approximately 30 years beyond the target retirement date.

Choose your target date fund in two easy steps.

| Step 1: If you were born in | Step 2: And you plan to retire (or have retired) in | Then consider choosing this fund |
|--------------------------------|--|----------------------------------|
