## Management's discussion of fund performance

The fund's Class A shares gained 5.36% for the year ended October 31, 2025. That result compares with a 5.47% gain for the Bloomberg 1-5 Year U.S. Government/Credit A+ Index. For information on returns for additional periods, including the fund lifetime, please refer to [capitalgroup.com/mutual-fund-returns-A](http://capitalgroup.com/mutual-fund-returns-A).

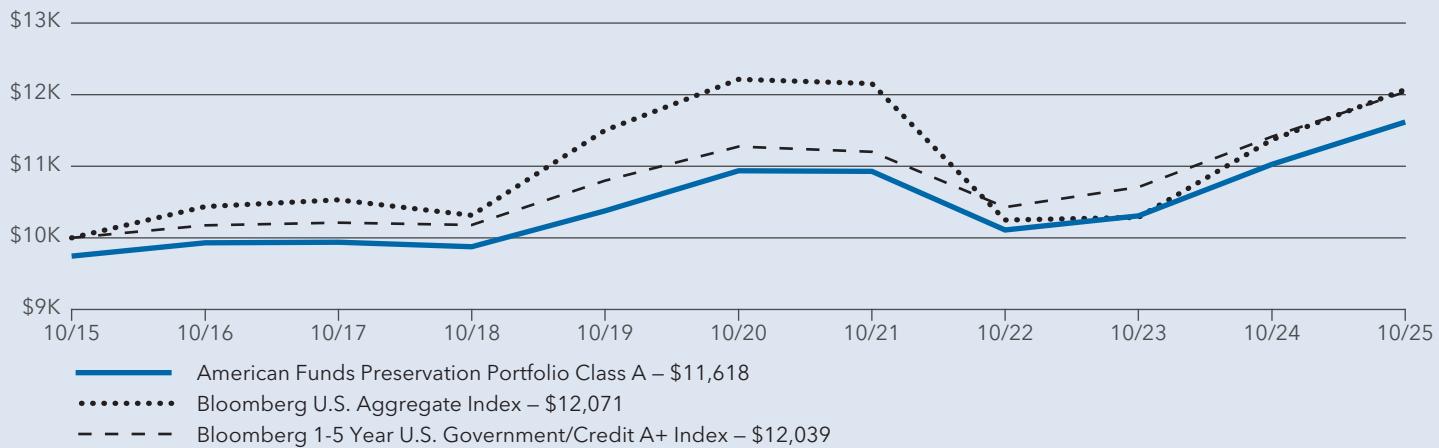

## What factors influenced results

During the fund's fiscal year, the U.S. fixed income market generated strong returns, with corporate bond spreads narrowing to their tightest levels in 15 years. Long-term Treasury yields climbed toward decade highs amid geopolitical uncertainty and evolving expectations around Federal Reserve policy. The 10-year U.S. Treasury yield peaked in mid-January before gradually declining to end the year close to its low for the year. The Fed reduced interest rates four times to address persistent inflation and signs of weakness in the labor market.

The fund's securitized fixed income assets accounted for more than half of the portfolio and were a key contributor to returns for the year. Investment-grade corporates also delivered strong returns. Additionally, the fund had a sizable weighting toward Treasuries, which offered potential for income and stability, consistent with the fund's objectives.
