Growth of a hypothetical $1,000 investment in The Investment Company of America (ICA) from 1934 through 2025

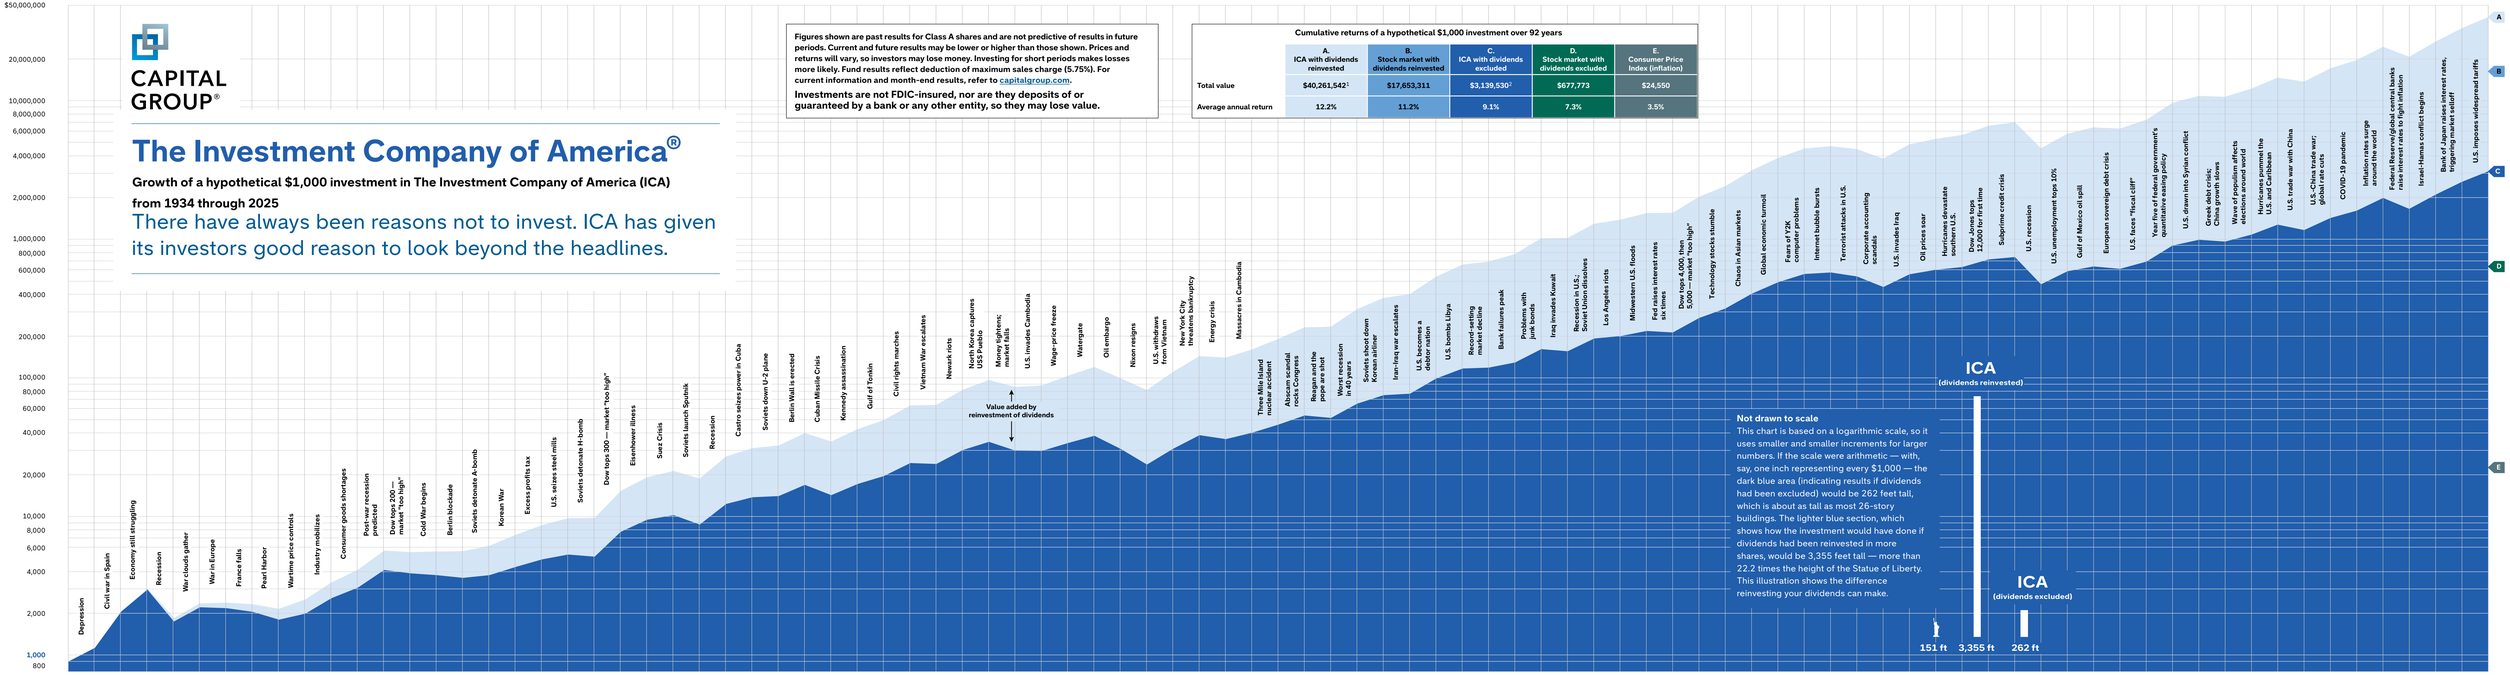

There have always been reasons not to invest. ICA has given its investors good reason to look beyond the headlines.

Figures shown are past results for Class A shares and are not predictive of results in future periods. Current and future results may be lower or higher than those shown. Prices and returns will vary, so investors may lose money. Investing for short periods makes losses more likely. Fund results reflect deduction of maximum sales charge (5.75%). For current information and month-end results, refer to capitalgroup.com.

Investments are not FDIC-insured, nor are they deposits of or guaranteed by a bank or any other entity, so they may lose value.

Not drawn to scale

This chart is based on a logarithmic scale, so it uses smaller and smaller increments for larger numbers. If the scale were arithmetic — with, say, one inch representing every $1,000 — the dark blue area (indicating results if dividends had been excluded) would be 262 feet tall, which is about as tall as most 26-story buildings. The lighter blue section, which shows how the investment would have done if dividends had been reinvested in more shares, would be 3,355 feet tall — more than 22.2 times the height of the Statue of Liberty. This illustration shows the difference reinvesting your dividends can make.
