

Key information

Objective:

The fund's investment objective is to provide you with current income consistent with the maturity and quality standards described in this prospectus and preservation of capital.

Distinguishing characteristics:

Balancing income and preservation, this limited-term bond strategy seeks to reduce interest rate risk and diversify equity exposure by holding only investment-grade, dollar-denominated bonds in a portfolio with a dollar-weighted average effective maturity between three and five years.

Figures shown are past results and are not predictive of results in future periods. Current and future results may be lower or higher than those shown. Investing for short periods makes losses more likely. Prices and returns will vary, so investors may lose money. For current fund information and month-end results, visit capitalgroup.com.

Returns at net asset value (NAV) do not reflect a sales charge. If a sales charge had been deducted, the results would have been lower.

Returns shown at maximum offering price (MOP) for Class A shares reflect deduction of the 2.50% maximum sales charge.

Investments are not FDIC-insured, nor are they deposits of or guaranteed by a bank or any other entity, so they may lose value.

Investors should carefully consider investment objectives, risks, charges and expenses. This and other important information is contained in the fund prospectuses and/or summary prospectuses, which can be obtained from a financial professional and should be read carefully before investing.

This material must be preceded or accompanied by a prospectus or summary prospectus for the fund(s) being offered.

The use of derivatives involves a variety of risks, which may be different from, or greater than, the risks associated with investing in traditional securities, such as stocks and bonds.

The return of principal for bond portfolios and portfolios with significant underlying bond holdings is not guaranteed. Investments are subject to the same interest rate, inflation and credit risks associated with the underlying bond holdings.

There have been periods when the results lagged the index(es) and/or average(s). The indexes are unmanaged and, therefore, have no expenses.

Investors cannot invest directly in an index.

Bond ratings, which typically range from AAA/Aaa (highest) to D (lowest), are assigned by credit rating agencies such as Standard & Poor's, Moody's and/or Fitch, as an indication of an issuer's creditworthiness. Unless otherwise noted below, if agency ratings differ, a security will be considered to have received the highest of those ratings, consistent with applicable investment policies. Securities in the Unrated category have not been rated by any of the rating agencies referenced above; however, the investment adviser performs its own credit analysis and assigns comparable ratings that are used for compliance with applicable investment policies.

Portfolios are managed, so holdings will change. Certain fixed income and/or cash and equivalents holdings may be held through mutual funds managed by the investment adviser or its affiliates that are not offered to the public.

Totals may not reconcile due to rounding and/or cash flows.

Investment results assume all distributions are reinvested and reflect applicable fees and expenses.

When applicable, results reflect fee waivers and/or expense reimbursements, without which they would have been lower and net expenses higher. For more information on fee waivers and expense reimbursements, visit capitalgroup.com.

1. The distribution rate reflects the fund's past dividends paid to shareholders and may differ from the fund's SEC yield which reflects the rate at which the fund is earning income on its current portfolio of securities. The distribution rate reflects fee waivers and/or expense reimbursements in effect during the period. Without waivers and/or reimbursements, it would be reduced.
2. Expense ratios are as of each fund's prospectus/characteristics statement, as applicable, available at the time of publication.
3. Portfolio market value reflect risk notional values. Risk notional is the value of the underlying asset at the current market price for a derivatives trade.
4. Sector breakdown "Other" may include equities, rights, warrants, preferreds, convertibles, forwards, the market value of certain derivative instruments and other uncategorized securities.
5. Includes cash, short-term securities, other assets less liabilities, and may include accrued income. It may also include investments in money market or similar funds managed by the investment adviser or its affiliates that are not offered to the public.
6. The offset represents positions within the portfolio used to offset risk and is -1 multiplied by the total of all notional values.
7. When applicable, returns for less than one year are not annualized, but calculated as cumulative total returns.
8. YTD (year-to-date return): For the period from January 1 of the current year to the date shown or from inception date if first offered after January 1 of the current year.
9. Data for the periods listed below reflect certain sales charge deductions.
- Maximum of 3.75% (from 1/10/2000 to 10/31/2006)
10. Index and/or average lifetime is based on the fund inception date.
11. The information shown does not include cash and cash equivalents. This includes shares of money market or similar funds managed by the investment adviser or its affiliates that are not offered to the public.
12. Rating exposure "Other" may include equities, rights, warrants, preferreds, convertibles, forwards and FX (foreign exchange) options.

Bond Statistic Average Yield to Worst: Lower of Yield to Maturity or the bond's total return if put or call options are exercised prior to maturity but no default occurs. **Total Return Swap:** A total return swap (TRS) is a contract between a total return payer and total return receiver. The payer usually pays the total return of agreed security to the receiver and receives a fixed/floating rate payment in exchange. The agreed (or referenced) security can be a bond, index, equity, loan, or commodity. **Bond Statistic Effective Duration in Years:** Effective duration is a duration calculation for bonds that takes into account that expected cash flows will fluctuate as interest rates change. **Distribution Rate 12-Month:** The income per share paid by the fund over the past 12 months to an investor from dividends (including any special dividends). The distribution rate is expressed as a percentage of the current price. **Credit Default Swap Index:** The credit default swap index (CDX) is a benchmark financial instrument made up of credit default swaps (CDS) that have been issued by North American or emerging markets companies. Credit default swaps act like insurance policies offering a buyer protection in case of the borrower's default. **Yield Annualized 30-Day SEC:** The 30-day SEC yield reflects the rate at which the fund is earning income on its current portfolio of securities calculated according to the standardized SEC formula; when applicable, it reflects the maximum sales charge. If shown, a net yield reflects fee waivers and/or expense reimbursements in effect during the period. Without waivers and/or reimbursements, the yield would be reduced. Gross yield does not adjust for any fee waivers and/or expense reimbursements in effect. **U.S. Intermediate-Term Fixed Income Custom Benchmark:** The U.S. Intermediate-Term Fixed Income Custom Benchmark returns reflect the results of the Bloomberg U.S. Government/Credit 1-7 Years ex BBB Index from December 31, 1985, to December 1, 2019, and the Bloomberg 75% U.S. Government/Credit 1-7 Years 25% U.S. Securitized Index thereafter. The Bloomberg U.S. Government/Credit 1-7 Years ex BBB Index is a market-value weighted index that tracks the total return results of fixed-rate, publicly placed, dollar-denominated obligations issued by the U.S. Treasury, U.S. government agencies, quasi-federal corporations, corporate or foreign debt guaranteed by the U.S. government, and U.S. corporate and foreign debentures and secured notes that meet specified maturity, liquidity and quality requirements, with maturities of one to seven years, excluding BBB-rated securities. The Bloomberg U.S. Government/Credit 1-7 Years Index is a market-value weighted index that tracks the total return results of fixed-rate, publicly placed, dollar-denominated obligations issued by the U.S. Treasury, U.S. government agencies, quasi-federal corporations, corporate or foreign debt guaranteed by the U.S. government, and U.S. corporate and foreign debentures and secured notes that meet specified maturity, liquidity and quality requirements, with maturities of one to seven years. The Bloomberg U.S. Securitized Index measures the performance of the USD-denominated, fixed-rate, U.S. investment grade taxable bond market. The index includes mortgage-backed-securities (MBS), asset-backed securities (ABS), commercial mortgage-backed securities (CMBS) and covered assets. This assumes the blend is rebalanced monthly. This index is unmanaged, and results include reinvested dividends and/or distributions but do not reflect the effect of commissions, expenses or U.S. federal income taxes.
