

\$500,000,000

The Investment Company of America

Growth of a hypothetical \$10,000 investment from 1934 through 2023

There have always been reasons not to invest. ICA has given its investors good reason to look beyond the headlines.

Figures shown are past results for Class A shares and are not predictive of results in future periods. Current and future results may be lower or higher than those shown. Prices and returns will vary, so investors may lose money. Investing for short periods makes losses more likely. Fund results reflect deduction of maximum sales charge (5.75%). For current information and month-end results, refer to capitalgroup.com. Investments are not FDIC-insured, nor are they deposits of or guaranteed by a bank or any other entity, so they may lose value.

Cumulative returns of a hypothetical \$10,000 investment over 90 years

Total value	\$267,400,745 ¹	\$119,786,412	\$21,281,776 ²	\$4,722,603	\$232,383
Average annual return	12.0%	11.0%	8.9%	7.1%	3.6%

Not drawn to scale
This chart is based on a logarithmic scale, so it uses smaller and smaller increments for larger numbers. If the scale were arithmetic – with, say, one inch representing every \$10,000 – the dark blue area (indicating results if dividends had been excluded) would be 177 feet tall, which is about as tall as most 18-story buildings. The lighter blue section, which shows how the investment would have done if dividends had been reinvested in more shares, would be 2,228 feet tall – nearly 15 times the height of the Statue of Liberty. This illustration shows the difference reinvesting your dividends can make.

Results reflect payment of the maximum 5.75% sales charge for Class A shares on a hypothetical \$10,000 investment. Thus, the net amount invested was \$9,425. The maximum initial sales charge was 8.5% prior to July 1, 1988. As outlined in the prospectus, the sales charge is reduced for larger investments. There is no sales charge on dividends or capital gain distributions that are reinvested in additional shares. The results shown are before taxes on fund distributions and sale of fund shares. Past results are not predictive of results in future periods. Results for other share classes may differ.

Here are ICA's average annual total returns on a \$1,000 investment with all distributions reinvested for periods ended December 31, 2023:

	1 year	5 years	10 years
Class A shares	21.10%	12.77%	9.96%

Expense ratio was 0.58% as of the fund's prospectus available at time of publication.

Investment results assume all distributions are reinvested and reflect applicable fees and expenses. When applicable, results reflect fee waivers and/or expense reimbursements, without which they would have been lower. Refer to capitalgroup.com for more information.
¹ Includes dividends of \$50,173,242 and capital gain distributions totaling \$119,489,066, reinvested in the years 1936-2023.
² Includes reinvested capital gain distributions of \$11,888,965, but not income dividends totaling \$5,278,023 taken in cash.

The stock market is represented by the S&P 500 Index, a market capitalization-weighted index based on the results of approximately 500 widely held common stocks. This index is unmanaged, and its results include reinvested dividends and/or distributions but do not reflect the effect of sales charges, commissions, account fees, expenses or U.S. federal income taxes. There have been periods when the fund has lagged the index. Investors cannot invest directly in an index. **Consumer Price Index** is a measure of the average change over time in the prices paid by urban consumers for a market basket of consumer goods and services. Widely used as a measure of inflation, the CPI is computed by the U.S. Department of Labor, Bureau of Labor Statistics.

Investors should carefully consider investment objectives, risks, charges and expenses.
