GROUP®**

**AMERICAN
FUNDS®**

Think no one can
beat the index?

Think again.

The average manager can't beat the index ...

Investors seeking better outcomes face a well-documented challenge: how to beat the index. At first glance, it may seem impossible, but take a closer look and it becomes clear that there are investment managers who have beaten the index, and have done so consistently.

We believe three questions can provide a simple framework to help identify investment managers with the potential to endure and meet long-term investing goals:

1.

What are their historical results?

Historical results can be an important indicator of the strength of a manager's process across market cycles, even though they are not predictive of future results.

2.

How did they achieve these results?

Results that can be attributed to a combination of distinguishing factors – a culture of stewardship, alignment with shareholders and a systematic process – can uncover managers that are focused on delivering strong long-term outcomes.

3.

Is there reason to believe the results can be repeated?

Enduring factors and a repeatable process may suggest that a manager can generate results to power your clients' portfolios over time.

Explore Capital Group's equity-focused American Funds through this evaluative framework

Figures shown are past results for Class A shares and are not predictive of future periods. Results shown at net asset value (NAV) do not reflect the maximum sales charge of 5.75%. If sales charges had been applied, results would have been lower. Returns shown at maximum offering price (MOP) reflect the deduction of the maximum sales charge. Current and future results may be lower or higher than those shown. Prices and returns will vary, so investors may lose money. Investing for short periods makes losses more likely. For current information and month-end results, visit capitalgroup.com.

Investments are not FDIC-insured, nor are they deposits of or guaranteed by a bank or any other entity, so they may lose value.

... but not all managers are average.

At Capital Group, our mission is to improve people's lives through successful investing. Our long-standing culture of stewardship, together with The Capital System™, has powered our ability to deliver superior long-term outcomes.

American Funds equity-focused funds outpaced their benchmarks over their respective lifetimes, on average:

85.4%

of the time¹

U.S. equity funds outpaced the S&P 500 over the last 20 years, on average:

43.9%

of the time²

“

Capital Group has been an Exemplary Stewardship nominee every year since the award's 2019 inception. The multimanager approach ... used since 1958 underpins much of the firm's success. The firm's large roster of proven investors have achieved superior investment results over very long stretches.

Bridget B. Hughes, CFA
Morningstar, April 11, 2022⁴

2023 winner of the Morningstar Exemplary Stewardship award³

”

¹Source: Capital Group calculations based on rolling monthly 20-year periods over each of the existing funds' respective lifetimes for Class A shares at net asset value. In this calculation, 15 of the 20 equity-focused American Funds had lifetimes long enough to calculate. Please see the appendix for a list of all of the American Funds and their primary benchmarks. Six of these funds' primary benchmark is the S&P 500.

²Capital Group calculations using data from Morningstar as of 12/31/22. Based on calendar-year returns of actively managed funds, excluding American Funds, in the Morningstar U.S. Fund Large Value, Blend and Growth categories. The groupings were filtered for oldest share class and excluded fund of funds, index funds, feeder funds, lifecycle funds, in-house funds of funds and enhanced index funds.

³Source: "U.S. Morningstar Awards for Investing Excellence: The 2023 Winners," Morningstar.com. In March, Capital Group was announced as the winner of the 2023 U.S. Morningstar Exemplary Stewardship Award, recognizing Capital Group for investment and business cultures that prioritize investors' interests above all else. In order to qualify for the award, which is a part of the 2023 U.S. Morningstar Awards for Investing Excellence, all nominees must have received a Parent pillar rating of "High" and remain investor-focused through 2022. Capital Group did not pay to be considered among the award nominees or pay to use the information in this material.

Equity-focused mutual funds with enduring, index-beating lifetime results

Proponents of index investing claim it is nearly impossible to beat the index over the long term. Yet, nearly all of our equity-focused American Funds have generated index-beating lifetime results, even though there have been times when the funds lagged their indexes.

Lifetime annual return of equity-focused American Funds

EXHIBIT DETAILS

Class A shares, at net asset value.

1.25% pts

Average annual excess return over 786 combined fund years, as of December 31, 2022⁵

■ American Funds (%)
■ Index (%)

⁵Time-weighted average annual excess return across these 20 equity-focused American Funds. The equal-weighted average annual excess return is 1.13 percentage points. The time-weighted average gives greater emphasis to those funds that have been in existence longer. For example, this means that the 1.05 percentage-point annualized difference between The Investment Company of America and its benchmark is given proportionally greater weighting in alignment with its more than 89 years in existence when calculating the average across all 20 funds.

Returns are average annual total returns for benchmark indexes and average annual returns for funds at net asset value from fund inception through 12/31/22. The funds' indexes are as of 12/31/22. See individual fund detail pages at capitalgroup.com for current information and any applicable benchmark index changes. Please see the appendix for a list of the indexes used for comparison with each American Fund.

Past results are not predictive of results in future periods.

Five of the American Funds have delivered strong results against the S&P 500 since 1976

The first retail S&P 500 Index-tracking fund was founded in 1976. Between then and now, an investor could have done well for themselves by keeping their money invested in an index-tracking fund, while all five of the U.S. equity-focused American Funds available at the time have yielded even better results.

Hypothetical value of \$10,000 invested in five of the American Funds and the S&P 500 Index August 31, 1976 through December 31, 2022

EXHIBIT DETAILS

- Class A shares, at maximum offering price.
- Includes all five of the U.S. equity-focused American Funds available for investment when the first S&P 500 index-tracking fund was launched on August 31, 1976.

⁶The market index is unmanaged and, therefore, has no expenses. Investors cannot invest directly in an index.

Source: Capital Group.

Past results are not predictive of results in future periods.

Since 2000, nearly all of our equity-focused funds generated more wealth than their indexes or peers⁷ ...

The chart below illustrates how these American Funds fared during accumulation, demonstrating their endurance across major downturns in the 21st century.

EXHIBIT DETAILS

- Class A shares, at net asset value.
- Includes all equity-focused American Funds available for investment on December 31, 1999, none of which have since been liquidated or merged.
- Includes all dividends reinvested for indexes, peers and American Funds, and with no money withdrawn.

With the hypothetical \$100,000 initial investment illustrated below, American Funds ended the period having generated on average:

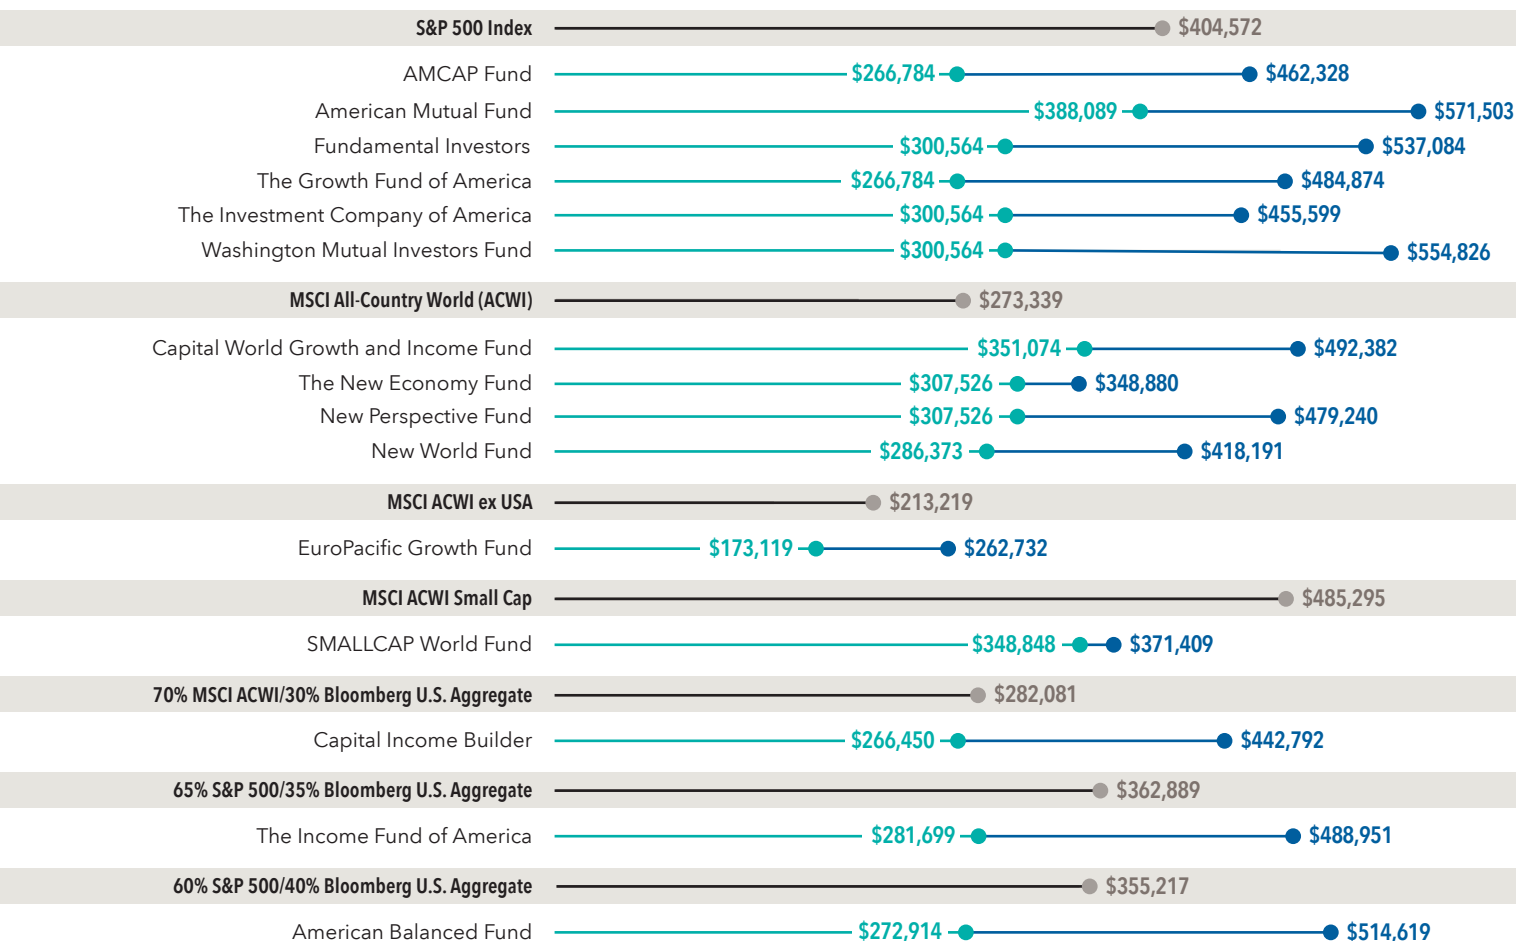

\$111,061
more wealth than indexes

\$164,435
more wealth than peer category averages⁷

\$0: Total amount **withdrawn** during the period

Ending value of a hypothetical \$100,000 investment

Fund/Index name ● Index ● Peer category average⁷ ● American Funds

⁷Peer category average represents each fund's respective Morningstar U.S. Active Fund category average. There may be funds within these categories that outpaced or lagged their category average and/or American Funds.

Returns shown for indexes include reinvested dividends. The market indexes are unmanaged and, therefore, have no expenses. Investors cannot invest directly in an index. There have been periods when the funds have lagged the index.

Past results are not predictive of results in future periods.

... and also fared better than both in distribution.

Moreover, these funds have not only preserved wealth in distribution but also, in some cases, continued to grow the initial investment while some of the peer category averages⁷ dropped to zero.

EXHIBIT DETAILS

- Class A shares, at net asset value.
- Includes all equity-focused American Funds available for investment on December 31, 1999, none of which have since been liquidated or merged.
- Monthly withdrawals totaled \$20,000 the first year (4% of the initial investment) and increased by 3% each year thereafter.

With the hypothetical \$500,000 initial investment illustrated below, American Funds ended the period having generated on average:

\$546,293

more wealth than indexes

\$528,953

more wealth than peer category averages⁷

\$649,058: Total amount **withdrawn** during the period

Capital Group calculations on Capital Group and Morningstar data, 12/31/99 to 12/31/22. All comparisons are to each of the funds' primary or secondary benchmarks as of 12/31/22. See individual fund detail pages at capitalgroup.com for current information and any applicable benchmark index changes. Please see the appendix for a list of each fund's respective Morningstar U.S. Active Fund category, as well as each fund's rolling returns and success rates for this period.

Past results are not predictive of results in future periods.

Asymmetric risk: An important consideration when constructing a diverse portfolio

Asymmetric risk is a measure of an investment opportunity's **upside capture** relative to its **downside capture**. One way to assess asymmetric risk is to examine **overall capture ratio**, illustrated by the dotted line in the chart below.

There are funds that may lag their benchmark in extended positive periods, but by losing less than their benchmarks in negative periods some funds can offer an asymmetric advantage.

20-year capture ratios of American Funds equity-focused funds (Class A shares, at net asset value)

11 out of our 15 equity-focused funds shown here have 20-year downside capture ratios less than 100%, with a

95%

average downside capture across all 15 funds

American Funds

Objective-based strategies designed with varying levels of risk and often including a secondary objective such as income or capital preservation.

Indexing strategy

Designed to track the index in up or down markets. It is not designed to outpace its benchmark.

Upside capture: Measures a fund's results in positive market periods relative to its benchmark; greater than 100% is better.

Downside capture: Measures a fund's results in negative market periods relative to its benchmark; less than 100% is better.

Overall capture ratio: Is upside divided by downside capture. Greater than 100% (or 1) is generally better.

Source: Capital Group. As of December 31, 2022. Funds without a 20-year history were excluded from analysis. Please see the table in the appendix for a list of the indexes used for comparison with each fund.

Fund name abbreviations: AMCAP Fund (AMCAP), American Balanced Fund (AMBAL), American Mutual Fund (AMF), Capital Income Builder (CIB), Capital World Growth and Income Fund (WGI), EuroPacific Growth Fund (EUPAC), Fundamental Investors (FI), The Growth Fund of America (GFA), The Income Fund of America (IFA), The Investment Company of America (ICA), The New Economy Fund (NEF), New Perspective Fund (NPF), New World Fund (NWF), SMALLCAP World Fund (SCWF), Washington Mutual Investors Fund (WMIF).

The information in relation to the index is provided for context and illustration only.

Please see page 17 for a more detailed explanation of asymmetric risk.

Past results are not predictive of results in future periods.

An asymmetric advantage in equity investments

Assessing a fund's asymmetric risk and returns can help investors gauge how it may perform over longer-term periods. To do this, we look at the consistency with which it beat the benchmark (success rate) and the strength of its relative gains (magnitude of excess returns).

Equity-focused mutual funds: ■ American Funds vs. ■ Actively managed funds

Here's a look at success rates and magnitude of excess returns over time.

Asymmetric returns

To determine asymmetric return, we use the formula shown at right. The 20-year asymmetric return for **American Funds** outpaced **actively managed funds** by 148 basis points.

$$\begin{aligned}
 & \left(\text{Success rate} \times \text{Magnitude of relative excess returns} \right) - \left(\text{Failure rate} \times \text{Magnitude of relative losses} \right) \\
 & \left(85\% \times 1.67 \right) - \left(15\% \times 0.62 \right) = 1.33 \\
 & \left(46\% \times 1.70 \right) - \left(54\% \times 1.73 \right) = -0.15 \\
 & \text{Difference: } 1.33 - (-0.15) = +148 \text{ bps}
 \end{aligned}$$

Sources: Capital Group, Morningstar. "Actively managed funds" data represent all actively managed, single-strategy, retail mutual funds (excluding American Funds) with the same primary prospective benchmarks and/or Morningstar category with one or more of American Funds' equity-focused mutual funds. Funds were considered actively managed if they were not classified by Morningstar as index funds. "American Funds" data represent our 20 equity-focused mutual funds. A full list of these funds, their primary benchmarks and their Morningstar categories can be found on page 16. Exhibits with time periods starting in 1996 or later correct for survivorship bias by including the return and expense history of funds that have merged or closed. Exhibits with time periods before 1996 reflect either live funds only or a combination of both data types (live funds only and survivorship bias free).

Totals may not reconcile due to rounding.

Market indexes are unmanaged and, therefore, have no expenses. Investors cannot invest directly in an index.

Please see page 17 for a more detailed explanation of asymmetric risk.

Past results are not predictive of results in future periods.

We have a strong culture of stewardship

Our portfolio managers have personal investments in the mutual funds. By taking a stake in their fund, managers convey their conviction in the approach and experience the ups and downs alongside fund investors.

Invested with you: Higher firm manager ownership

American Funds

91%

of **American Funds** assets are invested in mutual funds in which at least one manager has invested more than \$1 million.⁸

Industry

43%

of the 6,066 **actively managed** mutual funds are run by portfolio managers who do not invest a single dollar of their own money.⁹

Lower management fees

Our equity-focused mutual funds feature lower expense ratios than the average of their Morningstar category peers¹⁰ – a key element of our culture and philosophy.

EXHIBIT DETAILS

- Expense ratios reflect the most recent prospectus, as of December 31, 2022.
- Expense ratios shown for Class A shares.

⁸As of 2/17/23. There is 2.7% of manager ownership unaccounted for by Morningstar's calculation at the time data was pulled. Capital Group's manager ownership in previous years has been consistently around the 99th percentile.

⁹Capital Group, based on Morningstar data as of 2/17/23. All funds included in the analysis are non-index (active funds), based on oldest share class. Manager ownership information classified as "inconsistent" by Morningstar is not included. If fund liquidated or merged, this information is as of the latest Statement of Additional Information.

¹⁰Morningstar peer categories represent each fund's respective Morningstar Fee Level Group – Front Load category, which are as follows: Emerging Markets Stock (New World Fund, American Funds Developing World Growth and Income Fund); Foreign Large Cap (American Funds International Vantage Fund, EuroPacific Growth Fund, International Growth and Income Fund); Large Cap (AMCAP Fund, The Growth Fund of America, American Mutual Fund, Fundamental Investors, The Investment Company of America, Washington Mutual Investors Fund); Moderate Allocation (American Balanced Fund); Moderately Aggressive Allocation (The Income Fund of America); World Allocation (Capital Income Builder, American Funds Global Balanced Fund); World Large Stock (American Funds Global Insight Fund, The New Economy Fund, New Perspective Fund, Capital World Growth and Income Fund); World Small/Mid Stock (SMALLCAP World Fund).

Three screens can help uncover funds that have delivered strong, long-term outcomes

The American Funds aren't the only actively managed funds that have offered an asymmetric advantage for investors. To help narrow the field, Capital Group has spent years researching factors that have contributed to better-than-peer and better-than-benchmark results.

This research identified three screens – **strong downside capture**, **lower fees**, and **higher firm manager ownership** – that have enhanced outcomes consistently across every asset class, every time period and every market environment that we examined.

	U.S. Large Cap	Foreign Large Cap	World Stock Large	Emerging Markets	World Stock Small/Mid Cap	Moderate Allocation	World Allocation
Morningstar active funds universe and rolling 10-year success rates ^{11,12}	2,441 15%	701 45%	469 47%	378 20%	48 28%	494 11%	129 30%
Strong downside capture	1,028	302	195	162	21	211	59
Lower fees	255	151	97	81	11	105	29
High firm manager ownership	257	151	94	81	10	102	29
Screened active funds and rolling 10-year success rates^{12,13}	49 54%	66 83%	48 100%	48 98%	6 40%	59 50%	13 70%

90% of our equity-focused American Funds passed all three screens

Screen one

Strong downside capture

Funds that have exhibited **strong downside capture** versus peers over a rolling three-year period

Screen two

Lower fees

Funds that have fees in the **least expensive quartile** versus their peers

Screen three

High firm manager ownership

Funds managed by portfolio managers with the **highest quartile of firm manager ownership** in their fund

¹¹Comparisons with screened funds on page 9 used an asset-weighted methodology. This method can increase comparability between portfolios as compared with an equal-weighting methodology. See the appendix on pages 16-17 for methodology details.

¹²Success rates are calculated for rolling 10-year periods on a monthly basis from 1/1/96 to 12/31/22.

¹³Results reflect funds within the specified Morningstar category that met the combined low expense ratio, strong downside capture and high firm manager ownership screens. Not all individual funds beat their benchmark. Please see the appendix for indexes used to calculate the success rates for the different categories.

Sources: Capital Group, Morningstar as of December 31, 2022. Screens were based on historical fund performance in comparison with peer median. Best downside capture was defined as top 50%. Lowest expense ratio and highest manager ownership were defined as top 25% for the U.S. Large Cap category (owing to its larger sample size) and top 50% for the other categories.

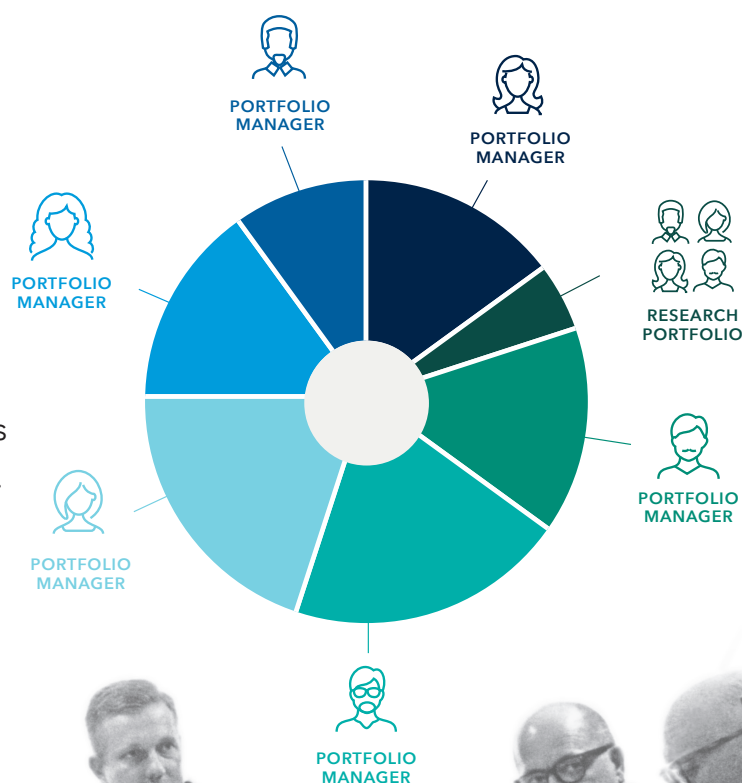

A time-tested, distinctive investment approach

Long-term investing objectives require a corresponding investment strategy and professionals aligned with that goal. At Capital Group, we strongly support this orientation in key ways and believe it is what makes The Capital Advantage – our time-tested results – possible.

The Capital System

The Capital System is the foundation of our investment success. Its multi-manager approach is designed to help our investment teams uncover high-quality opportunities, establish and refine a repeatable process and promote fund management continuity.

Its key feature enables each manager to invest in their highest conviction ideas within their portion of the portfolio. The Capital System is further enhanced by a flat structure that fosters a cooperative culture among managers and analysts, consideration for research related to material environmental, social, and governance issues, and robust interactions across regional and sector responsibilities.

Number of portfolio managers and portfolio segments shown for illustrative purposes only. This illustration does not reflect the makeup of a particular fund or strategy. Portfolio managers' best ideas may overlap.

PHOTO: A peek into the Capital Group investment process in action – an investment meeting in 1967. From left to right: Bob Egelston, Coleman Morton, Cecil Bessell, Inge Andonow, Howard Schow, Jon Lovelace, Bob Cody, Jonathan Bell Lovelace, Bill Newton and Marjorie Fisher.

Portfolio manager compensation

Compensation paid to our investment professionals is heavily influenced by investment results over one-, three-, five- and eight-year periods. Increasing weight is placed on each successive measurement period to encourage a long-term investment approach.

Compensation basis (years)

Privately-owned since 1931

As a privately held company, we're able to maintain a culture and pursue business strategies centered on what's right for long-term investors, not merely what will buoy the next quarter's financials.

Expansive research capabilities and global access¹⁵

Few firms match the scale and scope of our proprietary research effort. Our long-standing relationships with companies enable our vast investment network to conduct in-depth, fundamental research on businesses across the globe.

¹⁴Ma, Linlin and Tang, Yuehua and Gomez, Juan-Pedro, Portfolio Manager Compensation in the U.S. Mutual Fund Industry 2018. *Journal of Finance*.

¹⁵All data as of 12/31/22.

Stress test: Our results have been persistent

BALANCED FUNDS

¹⁷Morningstar, “The Thrilling 31: A List of Great Funds” by Russel Kinnel, October 2022. Morningstar’s screening took into consideration expense ratios, manager ownership, returns over manager’s tenure, and Morningstar Risk, Analyst and Parent ratings. The universe was limited to share classes accessible to individual investors with a minimum investment no greater than \$50,000 and did not include funds of funds. Class A shares were evaluated for American Funds. Visit Morningstar.com for more details.

Past results are not predictive of results in future periods.

Appendix

Listing of funds and their primary benchmarks

Rolling 10-year success rates (Class A shares, at net asset value)

Annual results for monthly rolling 10-year periods, 12/31/99–12/31/22	Average annual fund return	Average annual index return	Number of periods fund led index	Percentage of periods fund led index
S&P 500 Index

To facilitate the comparison of our funds to one another and peers, we have used the indexes/index blends described above. For more information about each fund's benchmark index, visit capitalgroup.com.

Results for American Funds Global Insight Fund, American Funds International Vantage Fund, International Growth and Income Fund and American Funds Global Balanced Fund are since each fund's inception on 4/1/11, 4/1/11, 10/1/08 and 2/1/11, respectively. American Funds Developing World Growth and Income Fund is not included because it has less than 10 years of results.

Past results are not predictive of results in future periods.

METHODOLOGY

Pages 4, 14-15, Lifetime index comparisons: The 20 American Funds equity-focused funds used in our analysis (and the relevant indexes/index blends to which they were compared) are: AMCAP Fund, American Mutual Fund, Fundamental Investors, The Growth Fund of America, The Investment Company of America and Washington Mutual Investors Fund (S&P 500); American Balanced Fund (60% S&P 500/40% Bloomberg U.S. Aggregate); American Funds Global Balanced Fund (60% MSCI All Country World/40% Bloomberg Global Aggregate); Capital Income Builder (70% MSCI All Country World/30% Bloomberg U.S. Aggregate); The Income Fund of America (65% S&P 500/35% Bloomberg U.S. Aggregate); Capital World Growth and Income Fund (Capital World Growth and Income Fund Historical Benchmarks Index); New Perspective Fund (New Perspective Fund Historical Benchmarks Index); New World Fund and The New Economy Fund (MSCI All Country World); EuroPacific Growth Fund (EuroPacific Growth Fund Historical Benchmarks Index); International Growth and Income Fund (International Growth and Income Fund Historical Benchmarks Index); SMALLCAP World Fund (SMALLCAP World Fund Historical Benchmarks Index); American

Funds Global Insight Fund (MSCI World); American Funds International Vantage Fund (MSCI EAFE Index); and American Funds Developing World Growth and Income Fund (MSCI Emerging Markets Index).

Some of these indexes lack sufficient history to cover the lifetime of certain funds. Comparable indexes were used for those periods. For American Balanced Fund, a 60% S&P 500/40% Bloomberg U.S. Government/Credit index blend was used for the period between July 26, 1975 (the fund's inception) and December 31, 1975. For Capital Income Builder, a 70% MSCI World/30% Bloomberg U.S. Aggregate index blend was used for the period between July 30, 1987 (the fund's inception) and December 31, 1987. For The Income Fund of America, a 65% S&P 500/35% Bloomberg U.S. Government/Credit index blend was used for the period between November 30, 1973 (the fund's inception) and December 31, 1975.

American Funds' Morningstar categories: The peer groups against which we compare American Funds in these charts reflect the averages of the relevant Morningstar U.S. Active Fund categories. The 20 equity-focused American Funds used in our analysis and their relevant Morningstar U.S. Active Fund categories with which they were compared are as follows: AMCAP Fund, The Growth Fund of America (Large Growth); American Mutual Fund (Large Value); Fundamental Investors, The Investment Company of America, Washington Mutual Investors Fund (Large Blend); American Balanced Fund (Allocation – 50% to 70% Equity); Capital Income Builder, American Funds Global Balanced Fund (Global Allocation); The Income Fund of America (Allocation – 70% to 85% Equity); American Funds Global Insight Fund, Capital World Growth and Income Fund (Global Large-Stock Blend); The New Economy Fund, New Perspective Fund (Global Large-Stock Growth); New World Fund, American Funds Developing World Growth and Income Fund (Diversified Emerging Markets); American Funds International Vantage Fund, EuroPacific Growth Fund (Foreign Large Growth); SMALLCAP World Fund (Global Small/Mid Stock); International Growth and Income Fund (Foreign Large Blend).

Page 11, Morningstar categories and indexes: U.S. Large Cap funds are those in the Morningstar Large Value, Large Blend and Large Growth categories. Foreign Large Cap funds are those in the Morningstar Foreign Large Value, Foreign Large Blend and Foreign Large Growth categories. World Stock Large funds are those in the Morningstar World Large Stock, Morningstar Global Large-Stock Blend, Global Large-Stock Growth and Global Large-Stock Value categories. Moderate Allocation funds are those in the Morningstar Allocation – 15% to 30% Equity, Allocation – 30% to 50% Equity, Allocation – 50% to 70% Equity, Allocation – 70% to 85% Equity and Allocation – 85%+ Equity. The other fund categories are the Morningstar Emerging Markets, World Stock Small/Mid Cap and Global Allocation. The indexes used for each Morningstar fund category are U.S. Large Cap (S&P 500), Foreign Large Cap (MSCI ACWI ex USA), World Stock Large (MSCI ACWI), Emerging Markets (MSCI Emerging Markets), World Stock Small/Mid Cap (MSCI ACWI Small Cap/S&P Global <\$3 Billion Index Linked Net), Moderate Allocation (60% S&P 500/40% Bloomberg U.S. Aggregate Index) and World Allocation (60% MSCI ACWI/40% Bloomberg Global Aggregate Index).

Page 11, Tracking downside capture, low expenses and high firm manager ownership: In conducting our research, we used most-in-time methodology. First we gathered Morningstar's database of actively managed funds, then divided them based on each of the fund's three-year rolling downside capture and how often the fund placed in each quartile for each period, which created our initial funnel. From there, funds were separated out, ranked by the lowest expense ratio quartile and the highest firm manager ownership at the firm level. For this analysis we relied on Morningstar DirectSM data analysis software.

The funds with the lowest expense ratios were calculated using annual report Net Expense Ratio (NER) for all observed Morningstar categories for the period indicated. The Securities and Exchange Commission (SEC) requires that mutual funds disclose all fees and expenses in a standardized table published in the front portion of a fund prospectus. The fund prospectus is Morningstar Direct's source for expense ratios. For share classes with missing expense ratios, gaps between two available data points were filled in using linear interpolation. Linear interpolation is used with expense ratios in our analysis to provide a larger and more complete dataset when some are missing from the dataset. Most of the missing expense ratios are for the first year a fund inception or the final year a fund was in existence (merged or liquidated). Interpolation is not used in these cases because there is not a data point before an inception year or after a final year of a fund. Interpolation is only used in the cases of an expense ratio missing in the middle of sequential expense ratios, as it is a straight line solve for an exact middle point between existing data points. For example, if the 2000 expense ratio is 35 bps, 2001 expense ratio is missing and 2002 expense ratio is 37 bps, interpolation would estimate 2001 as 36 bps. Interpolation accounts for approximately 1% or less of the expense ratios across the different categories. Using the Large Cap Domestic category as an example, approximately 1% of possible expense ratios were estimated that meet this criteria, increasing the number of comparable expense ratios from 26,905 to 27,167 over the period from 1996 to 2021.

The highest firm manager ownership was calculated using weighted averages of Morningstar screens of manager holdings. Morningstar tracks manager ownership as a percentage of assets at the firm level. This information can be found using Morningstar Cloud software on global.morningstar.com/direct. Within Morningstar Direct, the firm percentage assets manager investment data point is made using the following seven ranges: none; \$1 to

\$10,000; \$10,001 to \$50,000; \$50,001 to \$100,000; \$100,001 to \$500,000; \$500,001 to \$1,000,000; and over \$1,000,000. The Securities and Exchange Commission (SEC) requires that a fund disclose its manager ownership within these seven ranges in its Statement of Additional Information (SAI). For our illustrations, each fund was assigned a weighted average of its firm manager holdings using midpoints of the seven ranges. Funds without values were excluded from the quartile rankings.

Investors who wish to identify funds with high firm manager ownership using Morningstar Direct can rely on the following rules of thumb: 1. For the U.S. large cap, foreign large cap, world stock large, moderate allocation and world allocation categories, 81% of the funds in the highest firm manager ownership quartiles roughly corresponded with the firms that had 56% or more assets in the fund family complex in which at least one fund manager had invested a minimum of \$1 million; 2. For the emerging markets and world stock small/mid cap categories, 79% of funds in the two highest firm manager ownership quartiles roughly corresponded with firms that had 33% or more in assets in the fund family complex in which at least one fund manager had invested a minimum of \$1 million. These rules of thumb are a simplification of pulling a single data point for the funds in each category instead of the process we used, which was to pull the highest firm manager ownership data for the funds in each of the seven categories and then calculating a weighted average for all seven categories.

Investors who do not have Morningstar Direct can also use a fund's annual SAI as a general proxy for determining manager ownership. Fund SAIs are Morningstar Direct's source for manager ownership data. However, the manager ownership data in an SAI will be at the fund level rather than the firm level as calculated by Morningstar Direct for the illustrations in this brochure. To identify a fund's highest manager ownership using SAIs, investors should look for the fund's manager ownership in the top two ranges – \$500,001 to \$1,000,000 and over \$1,000,000.

The combination of highest downside capture, least expensive NER and highest firm manager ownership was the result of a cross-section of the three screens. Only those funds that pass all three screens were included.

Asset weighting methodology: Findings based on asset-weighting of funds rebalanced monthly, with portfolios equally weighted and rebalanced monthly used the following process: For each fund, net returns and asset sizes were gathered for all share classes available during each monthly time period. Returns and fees were then share-class weighted, meaning they were weighted according to the proportion of assets in each share class within each fund. Funds were then designated as active or passive, then grouped by Morningstar category. For exhibits with time periods starting 1996 or later, survivorship bias is corrected for. Exhibits with time periods before 1996 reflect either live funds only or a combination of both data types: live funds only and survivorship bias free. In cases where a fund is merged or closed, its asset-weighting is adjusted to zero. For newly created funds, the weight is zero until the period in which it has reported assets, whereupon we use the standard asset-weighting to weight the returns based on asset size.

Asymmetric risk: Asymmetric risk is the concept of taking a risk that will produce a return that surpasses the risk taken. Downside capture is the most common measurement of asymmetric risk but can also be summarized in the common phrase "risk-adjusted returns."

INDEX DESCRIPTIONS

The indexes are unmanaged, and their results include reinvested dividends and/or distributions but do not reflect the effect of sales charges, commissions, account fees, expenses or U.S. federal income taxes.

Bloomberg Global Aggregate Index represents the global investment-grade fixed income markets.

Bloomberg U.S. Aggregate Index represents the U.S. investment-grade fixed-rate bond market and consists of U.S. Treasury and government related bonds, corporate securities and asset-backed securities.

MSCI All Country World Index is a free float-adjusted, market capitalization-weighted index that is designed to measure results of more than 40 developed and developing country markets. Results reflect dividends gross of withholding taxes through 12/31/00, and dividends net of withholding taxes thereafter.

MSCI All Country World Small Cap Index is a free float-adjusted market capitalization-weighted index that is designed to measure equity market results of smaller capitalization companies in both developed and emerging markets. Results reflect dividends net of withholding taxes.

MSCI All Country World ex USA Index is a free float-adjusted, market capitalization-weighted index that is designed to measure results of more than 40 developed and emerging equity markets, excluding the United States. Results reflect dividends gross of withholding taxes through 12/31/00, and dividends net of withholding taxes thereafter.

MSCI EAFE (Europe, Australasia, Far East) Index is a free float-adjusted, market capitalization-weighted index that is designed to measure developed equity market results, excluding the United States and Canada. Results reflect dividends net of withholding taxes.

MSCI Emerging Markets Index is a free float-adjusted market capitalization weighted index that is designed to measure equity market results in the global emerging markets, consisting of more than 20 emerging market country indexes.

MSCI World Index is a free float-adjusted, market capitalization-weighted index that is designed to measure results of more than 20 developed equity markets. Results reflect dividends net of withholding taxes.

S&P 500 Index is a market capitalization-weighted index based on the average weighted results of approximately 500 widely held common stocks.

EuroPacific Growth Fund Historical Benchmarks Index returns reflect the results of the MSCI EAFE Index through 3/31/07 and the MSCI ACWI ex USA, the fund's current primary benchmark, thereafter. Results reflect dividends net of withholding taxes.

New Perspective Fund Historical Benchmarks Index returns reflect the results of the MSCI World Index through 9/30/11 and the MSCI ACWI, the fund's current primary benchmark, thereafter. Results reflect dividends net of withholding taxes.

SMALLCAP World Fund Historical Benchmarks Index returns reflect the results of the S&P Global <\$3 Billion Index through 9/30/09 and the MSCI All Country World Small Cap Index, the fund's current primary benchmark, thereafter. Cumulative returns for the S&P Global <\$3 Billion Index include results from the comparative indexes as follows: S&P Global <\$3 Billion (May 2006 to September 2009), S&P Global <\$2 Billion (May 2004 to April 2006), S&P Developed <\$1.5 Billion (January 2000 to April 2004), and S&P Developed <\$1.2 Billion (1990 to 1999). The S&P Global indexes include both developed and developing countries. The S&P Developed indexes (used prior to May 2004) only include stocks in developed countries. MSCI index results reflect dividends net of withholding taxes.

Capital World Growth and Income Fund Historical Benchmarks Index returns reflect the results of the MSCI World Index through 11/30/11 and the MSCI ACWI, the fund's current primary benchmark, thereafter. Results reflect dividends net of withholding taxes.

International Growth and Income Fund Historical Benchmarks Index returns reflect the results of the MSCI World ex USA Index through 6/30/11 and the MSCI ACWI ex USA, the fund's current primary benchmark, thereafter. Results reflect dividends net of withholding taxes.

IMPORTANT INFORMATION

Fund results for periods prior to the date of first sale are hypothetical based on the results of the original share class of the fund without a sales charge, adjusted for typical estimated expenses.

Investing outside the United States involves risks, such as currency fluctuations, periods of illiquidity and price volatility, as more fully described in the prospectus. These risks may be heightened in connection with investments in developing countries. Small-company stocks entail additional risks, and they can fluctuate in price more than larger company stocks. The return of principal for funds with significant underlying bond holdings is not guaranteed. Fund shares are subject to the same interest rate, inflation and credit risks associated with the underlying bond holdings. Lower rated bonds are subject to greater fluctuations in value and risk of loss of income and principal than higher rated bonds.

If used after 6/30/23, this brochure must be accompanied by the most recent American Funds quarterly statistical update.

Investment results assume all distributions are reinvested and reflect applicable fees and expenses. Expense ratios are as of each fund's prospectus available at the time of publication. When applicable, results reflect fee waivers and/or expense reimbursements, without which they would have been lower. Please see capitalgroup.com for more information.

For American Funds Global Insight Fund and American Funds International Vantage Fund, Class A shares were first offered on November 8, 2019. Class A share results prior to the date of first sale are hypothetical based on the results of the original share class of the funds, adjusted for typical estimated expenses. Please see capitalgroup.com for more information on specific expense adjustments and the actual dates of first sale.

The Capital Advantage[®]

Since 1931, Capital Group, home of American Funds, has helped investors pursue long-term investment success. Our consistent approach – in combination with The Capital System[™] – has resulted in superior outcomes.

Aligned with investor success

We base our decisions on a long-term perspective, which we believe aligns our goals with the interests of our clients. Our portfolio managers average 28 years of investment industry experience, including 22 years at our company, reflecting a career commitment to our long-term approach.¹

The Capital System

The Capital System combines individual accountability with teamwork. Funds using The Capital System are divided into portions that are managed independently by investment professionals with diverse backgrounds, ages and investment approaches. An extensive global research effort is the backbone of our system.

American Funds' superior outcomes

Equity-focused funds have beaten their Lipper peer indexes in 87% of 10-year periods and 97% of 20-year periods.² Relative to their peers, our fixed income funds have helped investors achieve better diversification through attention to correlation between bonds and equities.³ Fund management fees have been among the lowest in the industry.⁴

¹Investment industry experience as of December 31, 2022.

²Based on Class A share results at net asset value for rolling monthly 10- and 20-year periods starting with the first 10- or 20-year period after each mutual fund's inception through December 31, 2022. Periods covered are the shorter of the fund's lifetime or since the comparable Lipper index inception date (except Capital Income Builder and SMALLCAP World Fund, for which the Lipper average was used). Expenses differ for each share class, so results will vary. Past results are not predictive of results in future periods.

³Based on Class A share results at net asset value as of December 31, 2022. Sixteen of the 18 fixed income American Funds that have been in existence for the three-year period showed a three-year correlation lower than their respective Morningstar peer group averages. S&P 500 Index was used as an equity market proxy. Correlation based on monthly total returns. Correlation is a statistical measure of how two securities move in relation to each other. A correlation ranges from -1 to 1. A positive correlation close to 1 implies that as one security moves, either up or down, the other security will move in "lockstep," in the same direction. A negative correlation close to -1 indicates that the securities have moved in the opposite direction.

⁴On average, our mutual fund management fees were in the lowest quintile 62% of the time, based on the 20-year period ended December 31, 2022, versus comparable Lipper categories, excluding funds of funds.

Past results are not predictive of future results. Investing for short periods makes losses more likely.

Investors should carefully consider investment objectives, risks, charges and expenses. This and other important information is contained in the fund prospectuses and summary prospectuses, which can be obtained from a financial professional and should be read carefully before investing.
