Fund Information

Began operations: July 30, 1987

Objective: The fund has two primary investment objectives. It seeks (1) to provide a level of current income that exceeds the average yield on U.S. stocks generally and (2) to provide a growing stream of income over the years. The fund’s secondary objective is to provide growth of capital.

Distinguishing characteristics: This globally diversified strategy focuses on prudently generating a growing stream of income that exceeds the yield paid by U.S. companies in general. This flexible equity-income strategy uses a mix of stocks and bonds in pursuit of its income objective, which has historically led to equity-like returns with relatively less volatility than global markets.*

*Source: Capital Group, based on the fund’s 5-year and 10-year average annual total returns on a rolling monthly basis and the 5- and 10-year annualized standard deviation on a trailing basis versus the MSCI All Country World Index for the period from December 1, 1998, to December 31, 2019.

Types of investments: Normally, at least 50% of assets will be invested in common stocks of large, established companies with proven records of increasing dividends. May also invest in preferred stocks, convertibles, bonds and cash.

Non-U.S. holdings: May invest up to 50% of assets outside the United States.

Portfolio restrictions: Normally, at least 90% of the fund’s portfolio will be invested in income-producing securities.

Implementation guidance: Consider for a global equity-income allocation

Figures shown are past results and are not predictive of results in future periods. Current and future results may be lower or higher than those shown. Prices and returns will vary, so investors may lose money. Investing for short periods makes losses more likely. For current information and month-end results, visit capitalgroup.com.

Returns shown at net asset value (NAV) have all distributions reinvested. If a sales charge had been deducted, the results would have been lower.

Investments are not FDIC-insured, nor are they deposits of or guaranteed by a bank or any other entity, so they may lose value.

Investors should carefully consider investment objectives, risks, charges and expenses. This and other important information is contained in the fund prospectuses and summary prospectuses, which can be obtained from a financial professional and should be read carefully before investing.

This material must be preceded or accompanied by a prospectus or summary prospectus for the fund(s) being offered.

Investing outside the United States involves risks, such as currency fluctuations, periods of illiquidity and price volatility. These risks may be heightened in connection with investments in developing countries.

The return of principal for bond portfolios and for portfolios with significant underlying bond holdings is not guaranteed. Investments are subject to the same interest rate, inflation and credit risks associated with the underlying bond holdings.

There may have been periods when the results lagged the index(es). Certain market indexes are unmanaged and, therefore, have no expenses. Investors cannot invest directly in an index.

However, Capital cannot be responsible for inaccuracies, incomplete information or updating of the information furnished by FactSet. The information provided in this report is meant to give you an approximate account of the funds’ date of first offering.

2Expense ratios are as of the most recent prospectus available at the time of publication.

3The portfolio managers shown are as of the fund’s most recent prospectus dated 01/01/2020.

4YTD (year-to-date return): the net change in the value of the portfolio (in percentage terms) from January 1 of the current year to the date shown above.

5Results for certain funds with an inception date after the share class inception also include hypothetical returns because those funds’ shares sold after the funds’ date of first offering.

6Figures include convertible securities; totals may not reconcile due to rounding. Methodology notes: The equity breakdown by revenue reflects the portfolio’s publicly traded equity holdings and excludes cash (and fixed income securities, if applicable). Underlying revenue data were compiled by MSCI and account for disparities in the way companies report their revenues across geographic segments. MSCI breaks out each company’s reported revenues into country-by-country estimates. MSCI provides revenue data figures based on a proprietary, standardized model. Revenue exposure at the portfolio and index level was calculated by using FactSet, which takes these company revenue exposures and multiplies by the company’s weighting in the portfolio and index. In this breakdown, Israel has been included in Europe.

7Cash and equivalents includes short-term securities, accrued income and other assets less liabilities. It may also include investments in money market or similar funds managed by the investment adviser or its affiliates that are not offered to the public.

8Unlike average maturity, average life includes the impact of callable bonds.
The information shown does not include cash and cash equivalents. This includes shares of money market or similar funds managed by the investment adviser or its affiliates that are not offered to the public.

Totals may not reconcile due to rounding.

**TERMS & DEFINITIONS**

**MSCI All Country World**: MSCI All Country World Index is a free float-adjusted market capitalization weighted index that is designed to measure equity market results in the global developed and emerging markets, consisting of more than 40 developed and emerging market country indexes. Results reflect dividends gross of withholding taxes through December 31, 2000, and dividends net of withholding taxes thereafter. This index is unmanaged, and its results include reinvested dividends and/or distributions but do not reflect the effect of sales charges, commissions, account fees, expenses or U.S. federal income taxes.

**Bloomberg Barclays U.S. Aggregate Index**: Bloomberg Barclays U.S. Aggregate Index represents the U.S. investment-grade fixed-rate bond market. This index is unmanaged, and its results include reinvested dividends and/or distributions but do not reflect the effect of sales charges, commissions, account fees, expenses or U.S. federal income taxes.

**70%/30% MSCI All Country World Index/Bloomberg Barclays U.S. Aggregate Index**: 70%/30% MSCI ACWI/Bloomberg Barclays U.S. Aggregate Index blends the MSCI All Country World Index with the Bloomberg Barclays U.S. Aggregate Index by weighting their total returns at 70% and 30%, respectively. Results assume the blend is rebalanced monthly.
