Investments are not FDIC-insured, nor are they deposits of or guaranteed by a bank or any other entity, so they may lose value. Investors should carefully consider investment objectives, risks, charges and expenses. This and other important information is contained in the fund prospectuses and summary prospectuses, which can be obtained from a financial professional and should be read carefully before investing.

This material must be preceded or accompanied by a prospectus or summary prospectus for the fund(s) being offered. The return of principal for bond funds and for funds with significant underlying bond holdings is not guaranteed. Fund shares are subject to the same interest rate, inflation and credit risks associated with the underlying bond holdings.

Lower rated bonds are subject to greater fluctuations in value and risk of loss of income and principal than higher rated bonds. Investing outside the United States involves risks, such as currency fluctuations, periods of illiquidity and price volatility. These risks may be heightened in connection with investments in developing countries.
Returns shown at net asset value (NAV) have all distributions reinvested. If a sales charge had been deducted, the results would have been lower.

There may have been periods when the results lagged the index(es). Certain market indexes are unmanaged and, therefore, have no expenses. Investors cannot invest directly in an index. Results for Lipper indexes/averages do not reflect sales charges. Lipper indexes track the largest mutual funds (no more than 30), represented by one share class per fund, in the corresponding Lipper category. Lipper averages reflect the current composition of all eligible mutual funds (all share classes) within a given category. To see the number of funds included in the Lipper category for each fund’s lifetime, please see the quarterly statistical update, available on www.capgroup.com.

All Capital Group trademarks mentioned are owned by The Capital Group Companies, Inc., an affiliated company or fund. All other company and product names mentioned are the property of their respective companies.

Investment returns assume all distributions are reinvested and reflect applicable fees and expenses. Returns for one year or less are not annualized, but calculated as cumulative total returns.

When applicable, investment returns reflect fee waivers and/or expense reimbursements, without which results would have been lower and net expense ratios higher if shown. This information is provided in detail in the shareholder reports. For more information on fee waivers and expense reimbursements, visit capitalgroup.com.

1In 2016, the Capital World Bond Fund changed its fiscal year-end from September to December; therefore, fiscal-year-end data prior to 2016 (excluding fund assets) are as of September. December 2016 portfolio turnover data reflect the period of September to December.

2Expense ratios are as of the most recent prospectus available at the time of publication.

3The portfolio managers shown are as of each fund’s most recent prospectus at time of publication.

4YTD (year-to-date return): the net change in the value of the portfolio (in percentage terms) from January 1 of the current year to the date shown above.

5Results for certain funds with an inception date after the share class inception also include hypothetical returns because those funds’ shares sold after the funds’ date of first offering.
Cash and equivalents includes short-term securities, accrued income and other assets less liabilities. It may also include investments in money market or similar funds managed by the investment adviser or its affiliates that are not offered to the public.

Unlike average maturity, average life includes the impact of callable bonds.

Totals may not reconcile due to rounding.

**TERMS & DEFINITIONS**

**Bloomberg Barclays Global Aggregate**: Bloomberg Barclays Global Aggregate Index represents the global investment-grade fixed income markets. This index is unmanaged, and its results include reinvested distributions but do not reflect the effect of sales charges, commissions, account fees, expenses or U.S. federal income taxes.

**Lipper Global Income Funds**: Lipper Global Income Funds Index is an equally weighted index of funds that invest primarily in U.S. dollar and non-U.S. dollar debt securities of issuers located in at least three countries, one of which may be the United States. The results of the underlying funds in the index include the reinvestment of dividends and capital gain distributions, as well as brokerage commissions paid by the funds for portfolio transactions and other fund expenses, but do not reflect the effect of sales charges, account fees or U.S. federal income taxes.

**Citigroup World Government Bond**: Citigroup World Government Bond Index is a comprehensive measure of the total return results of the government bond markets of more than 20 countries meeting certain market capitalization requirements.
