Fund Information

Began operations: February 1, 2007
Objective: Depending on the proximity to its target date, the fund will seek to achieve the following objectives to varying degrees: growth, income and conservation of capital. The fund will increasingly emphasize income and conservation of capital by investing a greater portion of its assets in bond, equity-income and balanced funds as it approaches and passes its target date. In this way, the fund seeks to balance total return and stability over time. Minimum initial investment: $250
Fund number: 65  CUSIP: 02630T712

Investments are not FDIC-insured, nor are they deposits of or guaranteed by a bank or any other entity, so they may lose value. Investors should carefully consider investment objectives, risks, charges and expenses. This and other important information is contained in the fund prospectuses and summary prospectuses, which can be obtained from a financial professional and should be read carefully before investing. This material must be preceded or accompanied by a prospectus or summary prospectus for the fund(s) being offered.

Interests in Capital Group’s U.S. Government Securities portfolios are not guaranteed by the U.S. government. Investing outside the United States involves risks, such as currency fluctuations, periods of illiquidity and price volatility. These risks may be heightened in connection with investments in developing countries. Small-company stocks entail additional risks, and they can fluctuate in price more than larger company stocks.

The return of principal for bond portfolios and for portfolios with significant underlying bond holdings is not guaranteed. Investments are subject to the same interest rate, inflation and credit risks associated with the underlying bond holdings. Lower rated bonds are subject to greater fluctuations in value and risk of loss of income and principal than higher rated bonds. Investments in mortgage-related securities involve additional risks, such as prepayment risk. While not directly correlated to changes in interest rates, the values of inflation-linked bonds generally fluctuate in response to changes in real interest rates and may experience greater losses than other debt securities with similar durations.
There may have been periods when the results lagged the index(es). Certain market indexes are unmanaged and, therefore, have no expenses.

The target date distribution strategy does not guarantee that investors' retirement goals will be met. The target date is the year in which an investor is assumed to retire and begin taking withdrawals. Investment professionals continue to manage each portfolio for 30 years after it reaches its target date. Each target date portfolio is composed of a mix of underlying funds and is subject to the risks and returns of those funds. Underlying funds may be added or removed during the year. Although the target date portfolios are managed for investors on a projected retirement date time frame, the residuals of the underlying funds.

Returns shown at net asset value (NAV) have all distributions reinvested. If a sales charge had been deducted, the results would have been lower.

Allocations may not achieve investment objectives. There are expenses associated with the underlying funds in addition to portfolio expenses. The portfolios' risks are directly related to the risks of the underlying funds. Each target date portfolio is composed of a mix of underlying funds and is subject to the risks and returns of those funds. Underlying funds may be added or removed during the year. Although the target date portfolios are managed for investors on a projected retirement date time frame, the allocation strategy does not guarantee that investors' retirement goals will be met. The target date is the year in which an investor is assumed to retire and begin taking withdrawals. Investment professionals continue to manage each portfolio, moving it from a more growth-oriented strategy to a more income-oriented focus as the target date gets closer. Investment professionals continue to manage each portfolio for 30 years after it reaches its target date. There may have been periods when the results lagged the index(es). TERMS & DEFINITIONS

S&P Target Date Through 2030: S&P Target Date Through 2030 Index, a subset of the S&P Target Date 2030 Index, has an asset allocation and glide path that aim to be more sensitive to longevity risk at, and beyond, the retirement date. The index is fully investable, with varying levels of exposure to the asset classes determined during an annual survey process of target date funds' holdings.

S&P 500: S&P 500 Index is a market capitalization-weighted index based on the results of approximately 500 widely held common stocks. This index is unmanaged, and its results include reinvested dividends and/or distributions but do not reflect the effect of sales charges, commissions, account fees, expenses or U.S. federal income taxes.
MSCI All Country World ex USA: MSCI All Country World ex USA Index is a free float-adjusted market capitalization weighted index that is designed to measure equity market results in the global developed and emerging markets, excluding the United States. The index consists of more than 40 developed and emerging market country indexes. Results reflect dividends gross of withholding taxes through December 31, 2000, and dividends net of withholding taxes thereafter. This index is unmanaged, and its results include reinvested dividends and/or distributions but do not reflect the effect of sales charges, commissions, account fees, expenses or U.S. federal income taxes.

Bloomberg Barclays U.S. Aggregate: Bloomberg Barclays U.S. Aggregate Index represents the U.S. investment-grade fixed-rate bond market. This index is unmanaged, and its results include reinvested dividends and/or distributions but do not reflect the effect of sales charges, commissions, account fees, expenses or U.S. federal income taxes.
