Figures shown are past results and are not predictive of results in future periods. Current and future results may be lower or higher than those shown. Share prices and returns will vary, so investors may lose money. Investing for short periods makes losses more likely. For current information and month-end results, visit americanfunds.com.

Returns shown at net asset value (NAV) have all distributions reinvested. If a sales charge had been deducted, the results would have been lower. Returns shown at maximum offering price (MOP) for Class A shares reflect payment of the 5.75% maximum sales charge.

Investments are not FDIC-insured, nor are they deposits of or guaranteed by a bank or any other entity, so they may lose value. Investors should carefully consider investment objectives, risks, charges and expenses. This and other important information is contained in the fund prospectuses and summary prospectuses, which can be obtained from a financial professional and should be read carefully before investing.

This material must be preceded or accompanied by a prospectus or summary prospectus for the fund(s) being offered. Interests in Capital Group’s U.S. Government Securities portfolios are not guaranteed by the U.S. government. Investing outside the United States involves risks, such as currency fluctuations, periods of illiquidity and price volatility. These risks may be heightened in connection with investments in developing countries. Small-company stocks entail additional risks, and they can fluctuate in price more than larger company stocks.

The return on principal for bond portfolios and for portfolios with significant underlying bond holdings is not guaranteed. Investments are subject to the same interest rate, inflation and credit risks associated with the underlying bond holdings. Lower rated bonds are subject to greater fluctuations in value and risk of loss of income and principal than higher rated bonds. Allocations may not achieve investment objectives. There are expenses associated with the underlying funds in addition to portfolio expenses. The portfolios’ risks are directly related to the risks of the underlying funds.
Each target date portfolio is composed of a mix of underlying funds and is subject to the risks and returns of those funds. Underlying funds may be added or removed during the year. Although the target date portfolios are managed for investors on a projected retirement date time frame, the allocation strategy does not guarantee that investors’ retirement goals will be met. The target date is the year in which an investor is assumed to retire and begin taking withdrawals. Investment professionals continue to manage each portfolio for 30 years after it reaches its target date.

There may have been periods when the results lagged the index(es). Certain market indexes are unmanaged and, therefore, have no expenses. Investors cannot invest directly in an index. All Capital Group trademarks mentioned are owned by The Capital Group Companies, Inc., an affiliated company or fund. All other company and product names mentioned are the property of their respective companies. Investment results assume all distributions are reinvested and reflect applicable fees and expenses. When applicable, investment results reflect fee waivers and/or expense reimbursements, without which results would have been lower. For more information on fee waivers and expense reimbursements, visit americanfunds.com.

1Expense ratios for funds of funds are as of the most recent prospectus available at the time of publication, and include the weighted average expenses of the underlying funds.

2Allocation percentages and underlying funds are subject to the Portfolio Oversight Committee’s discretion and will evolve over time. Underlying funds may be added or removed at any time.

3YTD (year-to-date return): the net change in the value of the portfolio (in percentage terms) from January 1 of the current year to the date shown above.

4Figures are based on holdings of the underlying funds, if applicable, as of date shown.

5Cash and equivalents includes short-term securities, accrued income and other assets less liabilities. It may also include investments in money market funds of funds that are not offered to the public.

6Unlike average maturity, average life includes the impact of callable bonds.

7This content, developed by Capital Group, home of American Funds, should not be used as a primary basis for investment decisions and is not intended to serve as impartial investment or fiduciary advice.

TERMS & DEFINITIONS

S&P Target Date Through 2040: S&P Target Date Through 2040 Index, a subset of the S&P Target Date 2040 Index, has an asset allocation and glide path that aim to be more sensitive to longevity risk at, and beyond, the retirement date. The index is fully investable, with varying levels of exposure to the asset classes determined during an annual survey process of target date funds’ holdings.

S&P 500: S&P 500 Index is a market capitalization-weighted index based on the results of approximately 500 widely held common stocks. This index is unmanaged, and its results include reinvested dividends and/or distributions but do not reflect the effect of sales charges, commissions, account fees, expenses or U.S. federal income taxes.
MSCI All Country World ex USA: MSCI All Country World ex USA Index is a free float-adjusted market capitalization weighted index that is designed to measure equity market results in the global developed and emerging markets, excluding the United States. The index consists of more than 40 developed and emerging market country indexes. Results reflect dividends gross of withholding taxes through December 31, 2000, and dividends net of withholding taxes thereafter. This index is unmanaged, and its results include reinvested dividends and/or distributions but do not reflect the effect of sales charges, commissions, account fees, expenses or U.S. federal income taxes.

Bloomberg Barclays U.S. Aggregate: Bloomberg Barclays U.S. Aggregate Index represents the U.S. investment-grade fixed-rate bond market. This index is unmanaged, and its results include reinvested dividends and/or distributions but do not reflect the effect of sales charges, commissions, account fees, expenses or U.S. federal income taxes.
