Figures shown are past results and are not predictive of results in future periods. Current and future results may be lower or higher than those shown. Prices and returns will vary, so investors may lose money. Investing for short periods makes losses more likely. For current information and month-end results, visit capitalgroup.com.

Returns shown at net asset value (NAV) have all distributions reinvested. If a sales charge had been deducted, the results would have been lower. Returns shown at maximum offering price (MOP) for Class A shares reflect deduction of the 5.75% maximum sales charge.

Class A share returns for periods ended 12/31/20\(^3\)

| Objective: | Depending on the proximity to its target date, the fund will seek to achieve the following objectives to varying degrees: growth, income and conservation of capital. The fund will increasingly emphasize income and conservation of capital by investing a greater portion of its assets in bond, equity- and balanced funds as it approaches and passes its target date. In this way, the fund seeks to balance total return and stability over time. Minimum initial investment: $250  
Fund number: 83

Investments are not FDIC-insured, nor are they deposits of or guaranteed by a bank or any other entity, so they may lose value.

Investors should carefully consider investment objectives, risks, charges and expenses. This and other important information is contained in the fund prospectuses and summary prospectuses, which can be obtained from a financial professional and should be read carefully before investing.

This material must be preceded or accompanied by a prospectus or summary prospectus for the fund(s) being offered.

The return of principal for bond funds and for funds with significant underlying bond holdings is not guaranteed. Fund shares are subject to the same interest rate, inflation and credit risks associated with the underlying bond holdings.

Lower rated bonds are subject to greater fluctuations in value and risk of loss of income and principal than higher rated bonds.

Investing outside the United States involves risks, such as currency fluctuations, periods of illiquidity and price volatility. These risks may be heightened in connection with investments in developing countries.

Fund shares of U.S. Government Securities Fund are not guaranteed by the U.S. government. Small-company stocks entail additional risks, and they can fluctuate in price more than larger company stocks.

Each target date portfolio is composed of a mix of underlying funds and is subject to the risks and returns of those funds. Underlying funds may be added or removed during the year. Although the target date portfolios are managed for investors on a projected retirement date time frame, the allocation strategy does not guarantee that investors’ retirement goals will be met. The target date is the year that corresponds roughly to the year in which an investor is assumed to retire and begin taking withdrawals. Investment professionals manage the portfolio, moving it from a more growth-oriented strategy to a more income-oriented focus as the target date gets closer. Investment professionals continue to manage each portfolio for approximately 30 years after it reaches its target date.
Results shown at net asset value (NAV) have all distributions reinvested. If a sales charge had been deducted, the results would have been lower.

Allocations may not achieve investment objectives. The portfolios’ risks are directly related to the risks of the underlying funds. There may have been periods when the results lagged the index(es). Certain market indexes are unmanaged and, therefore, have no expenses. Investors cannot invest directly in an index.

All Capital Group trademarks mentioned are owned by The Capital Group Companies, Inc., an affiliated company or fund. All other company and product names mentioned are the property of their respective companies.

Investment results assume all distributions are reinvested and reflect applicable fees and expenses. Returns for one year or less are not annualized, but calculated as cumulative total returns.

When applicable, investment returns reflect fee waivers and/or expense reimbursements, without which results would have been lower and net expense ratios higher if shown. This information is provided in detail in the shareholder reports. For more information on fee waivers and expense reimbursements, visit capitalgroup.com.

1Expense ratios for funds of funds are as of the most recent prospectus available at the time of publication, and include the weighted average expenses of the underlying funds.

2The portfolio managers shown are as of each fund’s most recent prospectus at time of publication.

3Allocation percentages and underlying funds are subject to the oversight committee’s discretion and will evolve over time. Underlying funds may be added or removed at any time.

4YTD (year-to-date return): the net change in the value of the portfolio (in percentage terms) from January 1 of the current year to the date shown above.

5Results for certain funds with an inception date after the share class inception also include hypothetical returns because those funds’ shares sold after the funds’ date of first offering.

6Totals may not reconcile due to rounding.

7Figures are based on holdings of the underlying funds, if applicable, as of date shown.

8Cash and equivalents includes short-term securities, accrued income and other assets less liabilities. It may also include investments in money market or similar funds managed by the investment adviser or its affiliates that are not offered to the public.

9Unlike average maturity, average life includes the impact of callable bonds.

This content, developed by Capital Group, home of American Funds, should not be used as a primary basis for investment decisions and is not intended to serve as impartial investment or fiduciary advice.

TERMS & DEFINITIONS

S&P Target Date Through 2060+ Index: The S&P Target Date Through 2060+ Index, a subset of the S&P Target Date 2060+ Index, has an asset allocation and glide path that aim to be more sensitive to longevity risk at, and beyond, the retirement date. The index is fully investable, with varying levels of exposure to the asset classes determined during an annual survey process of target date funds’ holdings.

S&P 500: S&P 500 Index is a market capitalization-weighted index based on the results of approximately 500 widely held stocks. This index is unmanaged, and its results include reinvested dividends and/or distributions but do not reflect the effect of sales charges, commissions, account fees, expenses or U.S. federal income taxes.
MSCI All Country World ex USA: MSCI All Country World ex USA Index is a free float-adjusted market capitalization weighted index that is designed to measure equity market results in the global developed and emerging markets, excluding the United States. The index consists of more than 40 developed and emerging market country indexes. Results reflect dividends gross of withholding taxes through December 31, 2000, and dividends net of withholding taxes thereafter. This index is unmanaged, and its results include reinvested dividends and/or distributions but do not reflect the effect of sales charges, commissions, account fees, expenses or U.S. federal income taxes.

Bloomberg Barclays U.S. Aggregate Index: Bloomberg Barclays U.S. Aggregate Index represents the U.S. investment-grade fixed-rate bond market. This index is unmanaged, and its results include reinvested dividends and/or distributions but do not reflect the effect of sales charges, commissions, account fees, expenses or U.S. federal income taxes.
